About

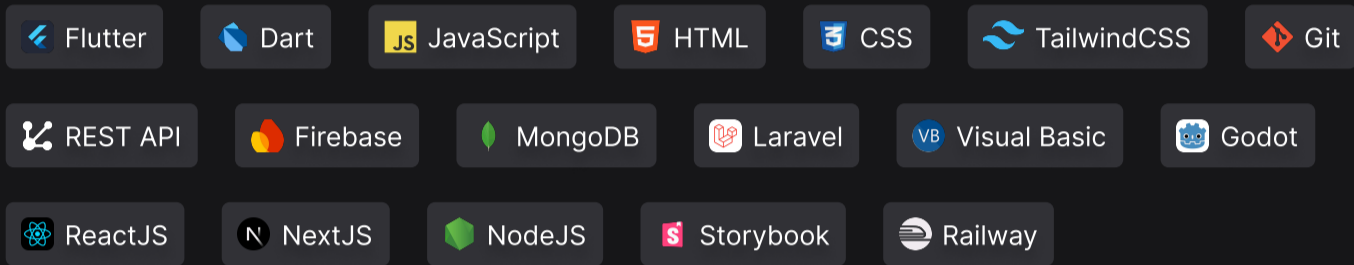

A programmer with 5 years of experience in software development, building responsive and scalable applications across both frontend and backend systems. Skilled in C#, JavaScript, HTML, CSS, and VB, with strong experience in modern web and application development using React, Next.js, Laravel, TailwindCSS, Godot, and Storybook. Experienced in database management with MongoDB and Firebase, and proficient in version control using Git. Focused on writing clean, maintainable, and efficient code, with an emphasis on user experience, performance, and product quality. Passionate about continuous learning and applying best practices to deliver reliable and impactful software solutions.

Languages
